Experiment 4: Scrum Project and Sprint Board in Jira

Course code: CSA1006

Course: Software Engineering

Name: B. Pavani

Register No: 192525248

Tool Used: Jira

Aim

To create a Scrum project in Jira, add tasks to the backlog, plan and start a sprint, and track the tasks on the Scrum board by moving them across the columns To Do, In Progress and Done.

Software Used

Jira Software, https://www.atlassian.com/software/jira

Procedure

Step 1: Log in to Jira

Open https://www.atlassian.com/software/jira in a browser and log in with your Atlassian account.

Step 2: Create a Scrum project

Click "Create" and choose "Space" (project), select the Scrum template and click "Use template". Enter the project name "Exp-4:Scrum project" and the key "SCRUM4", then click "Create".

Step 3: Add tasks to the backlog

Open the "Backlog" tab, click "+ Create" and type each task name ("What needs to be done?"), then press Enter. Add the five tasks listed in the table below. Jira numbers them SCRUM4-1 to SCRUM4-5.

Issue	Task Name	Purpose
SCRUM4-1	Create User Registration	Build the user registration feature
SCRUM4-2	Develop API for Login	Develop the API used for user login
SCRUM4-3	Design Home Page	Design the home page of the application
SCRUM4-4	Connect Database	Connect the application to the database
SCRUM4-5	Test Login Functionality	Test that the login works correctly

Step 4: Create and start the sprint

In the Backlog, drag the five tasks into "Sprint 1" and click "Start sprint". Enter the sprint name, duration and start date, then click "Start". The tasks now appear on the Board in the To Do column.

Step 5: Track the tasks on the Scrum board

Open the "Board" tab and drag each card to the column that matches its progress. SCRUM4-1 (Create User Registration) was moved to Done and SCRUM4-2 (Develop API for Login) was moved to In Progress. SCRUM4-3, SCRUM4-4 and SCRUM4-5 remain in To Do.

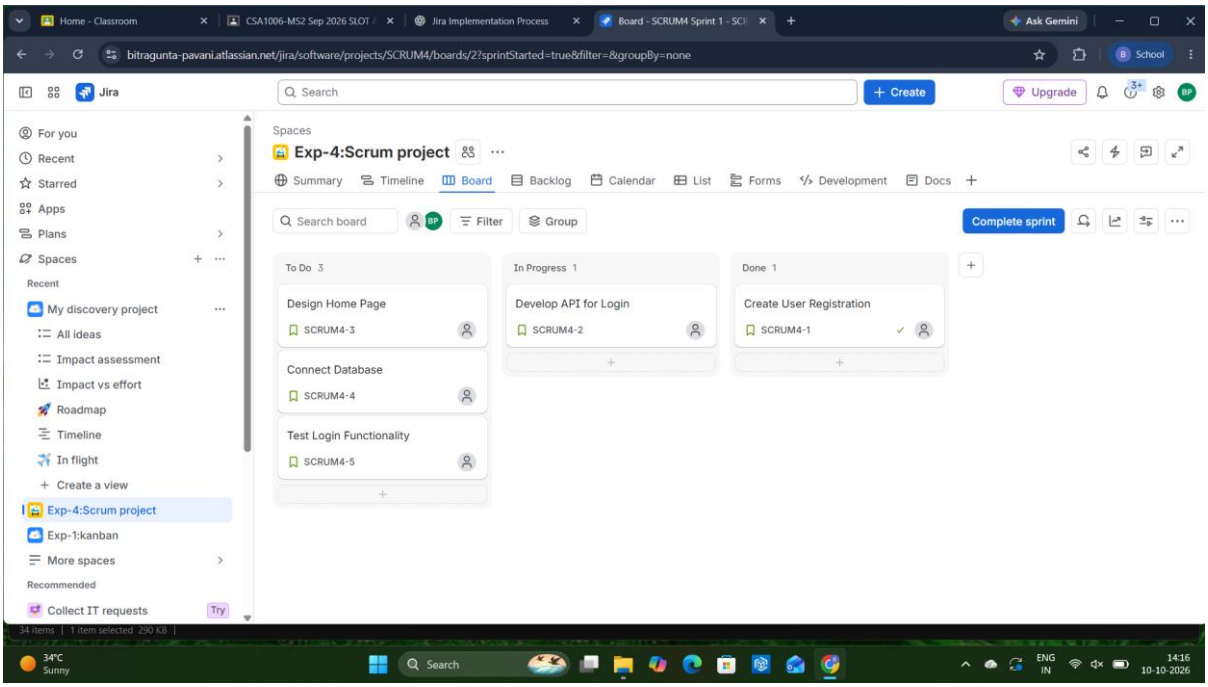

Figure 1: Scrum board of Sprint 1 in Jira after moving the tasks across the columns

Workflow Summary

Stage	To Do	In Progress	Done
Sprint started	SCRUM4-1 to SCRUM4-5	-	-
After moving tasks	SCRUM4-3, 4, 5	SCRUM4-2	SCRUM4-1

Result

A Scrum project was successfully created in Jira. Five tasks were added to the backlog, planned into Sprint 1 and tracked on the Scrum board by moving them across the To Do, In Progress and Done columns.
