Experiment 1: Kanban Board to Visualize Tasks

Course code: CSA1006

Course: Software Engineering

Name: B. Pavani

Register No: 192525248

Tool Used: Jira

Aim

To create a Kanban board in Jira with the columns To Do, In Progress and Done, add at least 5 sample tasks, and move the tasks across the columns to simulate a workflow.

Software Used

Jira Software, https://www.atlassian.com/software/jira

Procedure

Step 1: Sign up / Log in to Jira

Open https://www.atlassian.com/software/jira in a browser, click "Get it free" and sign up with an email address (or log in with an existing Atlassian account). Enter a site name when asked.

Step 2: Create a Kanban project

Click "Create" and choose "Space" (project), select the Kanban template and click "Use template". Enter the project name "Exp-1:kanban" and the key "KAN", then click "Create".

Step 3: Open the Kanban board and check the columns

Open the project and click the "Board" tab. The board shows the columns To Do, In Progress and Done (Jira also adds an In Review column by default).

Step 4: Create the sample tasks

In the To Do column click "+ Create", type the task name ("What needs to be done?") and press Enter. Add the five tasks listed in the table below. Jira numbers them KAN-1 to KAN-5.

Issue	Task Name	Purpose
KAN-1	Design the login page	Design the user login screen
KAN-2	Create the Home Page	Build the home page of the application
KAN-3	Develop User Registration	Code the user registration module
KAN-4	Test Login Functionality	Test that the login works correctly
KAN-5	Prepare Project Documentation	Write the project documentation

Step 5: Move the tasks across the columns

Drag and drop each card to the column that matches its progress. KAN-3 (Develop User Registration) was dragged from To Do to In Progress, and KAN-1 (Design the login page) was dragged through In Progress to Done. KAN-2, KAN-4 and KAN-5 remain in To Do, and the In Review column has no tasks.

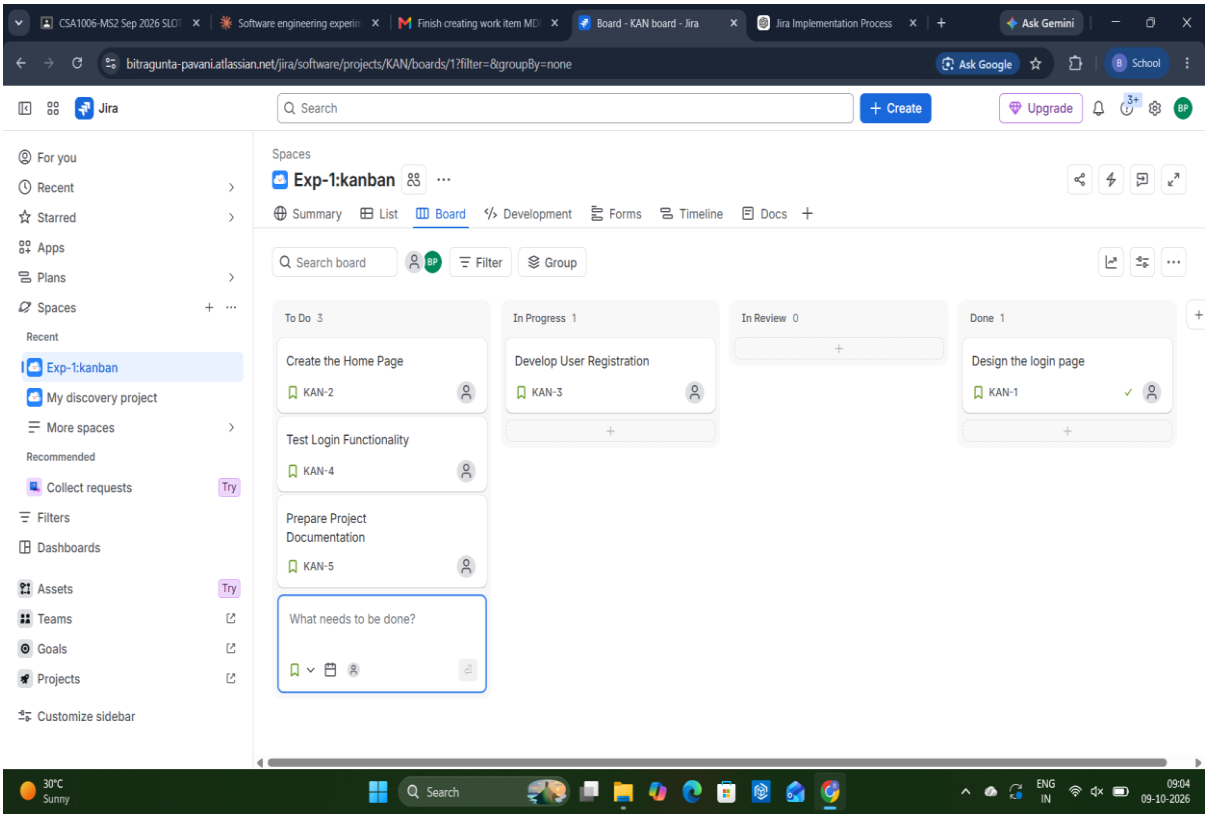

Figure 1: Kanban board in Jira after moving the tasks across the columns

Workflow Simulation Summary

Stage	To Do	In Progress	In Review	Done
Initial	KAN-1 to KAN-5	-	-	-
After moving tasks	KAN-2, KAN-4, KAN-5	KAN-3	-	KAN-1

Result

A Kanban board with the columns To Do, In Progress and Done was successfully created in Jira. Five sample tasks were added and moved across the columns, which visualized the task workflow of a software project.
